FINAL REJECTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In claim 1, line 5 and claim 2 line 5 "the frame circuit" is non statutory since it is merely a non functional descriptive material. Amendment to claim has not overcome the previous 101 rejection , since the claims still directed to a frame device and not to a network.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. "A frame circuit" comprising the fields listed in the claims is not described in the original specification

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2661

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 line 5 and claim 2 line 5 recite the limitation "the frame circuit" . There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

6. Claims 11-23 are allowed.

Response to Arguments

7. Applicant's arguments filed on 7/19/05 have been fully considered but they are not persuasive. Applicant argues that claims 1-10 have been amended to make it clear that the recited subject matter is "a network" which is clearly statutory subject matter, and as such the basis for rejection under section 101 has been removed. Examiner disagrees and in his opinion amendment does not overcome previous 101 rejection, since claims 1-10 still directed to a frame device, which is non statutory as above indicated, therefore rejections stands.

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
